

Nicolab and N-Vascular Technology Partner to Expand AI-Enabled Acute Stroke Workflow Technology Across India

Amsterdam, The Netherlands / Mumbai, India, 1st June 2026 – Nicolab, a global leader in AI-enabled acute stroke imaging and workflow technology, is pleased to announce a strategic partnership with N-Vascular Technology Private Limited to support the expansion of Nicolab's StrokeViewer platform across India.

Through this partnership, N-Vascular Technology will act as one of Nicolab's reseller partners in India, supporting local market engagement, customer relationships and the adoption of StrokeViewer by hospitals, stroke networks and healthcare providers across the country.

Stroke remains one of India's most urgent healthcare challenges, placing significant pressure on emergency departments, radiology teams, neurologists, interventional specialists and hospital networks. In acute stroke, time-critical access to imaging insights and coordinated clinical decision-making can directly influence the speed and confidence of patient pathways.

Nicolab's platform is designed to support clinicians across the acute stroke workflow by combining AI-enabled imaging insights (StrokeViewer) with secure communication, collaboration and workflow tools. Across NCCT, CTA and CTP imaging pathways, Nicolab helps stroke teams access relevant information quickly, collaborate across sites and support more informed treatment decision-making, wherever clinicians are located.

By partnering with N-Vascular Technology, Nicolab will strengthen its local presence in India through a partner with in-country market knowledge, customer relationships and an understanding of the operational realities facing Indian hospitals and stroke networks.

"India is one of the most important and dynamic healthcare markets in the world, with a clear need for scalable technologies that support faster, more connected stroke pathways," said Michael Macilquham, Chief Executive Officer at Nicolab. *"Our partnership with N-Vascular Technology is an important step in expanding access to Nicolab's StrokeViewer across India. Together, we aim to support clinicians with technology that strengthens acute stroke workflows, improves collaboration and helps healthcare teams make time-critical decisions with greater confidence."*

Piyush Kagadada of N-Vascular Technology Private Limited, said, "We are proud to partner with Nicolab to bring StrokeViewer to healthcare providers across India. Acute stroke care requires speed, precision and coordination across multiple clinical teams. Nicolab is strongly aligned with the needs of Indian hospitals and stroke networks, and we look forward to supporting its introduction across the country."

The partnership reflects Nicolab's broader commitment to improving access to advanced stroke imaging and workflow technology globally. With deployments across international healthcare markets, Nicolab continues to work with hospitals, clinical leaders and commercial partners to support faster imaging review, improved workflow efficiency and stronger collaboration across acute stroke pathways.

Together, Nicolab and N-Vascular Technology will focus on building market awareness, supporting clinical engagement and enabling Indian hospitals to evaluate AI-enabled stroke workflow technology in a way that is practical, compliant and aligned to local healthcare needs.

###

About Nicolab

Founded in 2015 following the world-leading MR CLEAN clinical trial, Nicolab is an Australian-based public unlisted company with headquarters in Amsterdam, The Netherlands. Its team of researchers, developers, and medical specialists develops innovative healthcare solutions to improve acute care and clinical collaboration across hospitals and networks.

Operating globally, Nicolab delivers a single, compact platform that combines Nicolab Assist, our collaboration suite for acute care, with StrokeViewer, our AI-powered imaging portfolio for stroke. The

platform helps clinicians coordinate care, make faster decisions, and streamline stroke treatment across hospitals and networks. Visit us at www.nicolab.com

About N-Vascular Technology Private Limited

N-Vascular Technology Private Limited is an India-based healthcare technology partner focused on supporting hospitals and clinical teams with innovative medical technologies. Through its local market knowledge and customer relationships, N-Vascular Technology supports the introduction of advanced healthcare solutions across India.
